

AMENDMENTS TO CLAIMS:

Agent for Applicant respectfully requests the following amendments to the claims without adding any new subject matter. Additions are shown in underlining, while deletions are shown in strikethrough or double square brackets.

1. [Currently Amended] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including an information output circuitry device which outputs information from said member, and an energy converter which converts energy to which the member is exposed to electrical energy for powering said information output circuitry device, wherein said information output circuitry is linked to a control for a moveable part of said member, and said information output circuitry outputs information regarding use of said control.
2. [Original] A member as claimed in Claim 1 wherein said energy converter comprises a solar panel provided on an exposed surface of said member.
3. [Currently Amended] A member as claimed in Claim 2 wherein said information output circuitry is further linked to device ~~comprises~~ a biorhythm sensor.
4. [Previously Presented] A member as claimed in Claim 3 including a digital display also powered by said energy converter and displaying information from said biorhythm sensor.
5. [Previously Presented] A member as claimed in Claim 1 wherein said member comprises a chair and said energy converter converts motion of a moveable portion of the chair to electrical energy.
6. [Currently Amended] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including an information output device which outputs information from said member, an energy converter which converts energy to which the member is exposed to electrical energy for powering said information output device. ~~A member as claimed in Claim 1~~ wherein said information output device comprises a control for a moveable part of said chair, said control outputting information regarding directions of use of said control without producing the movements of the chair.

7. [Currently Amended] A member as claimed in Claim 6 ~~[[5]]~~ wherein said control provides audio feedback providing the directions for use of said control.
8. [Currently Amended] A ~~member~~ members as claimed in Claim 6 including a visual display also powered by said energy converter, said visual display visually displaying the directions for use of the controls.
9. [Previously Presented] A member as claimed in Claim 1 including an electrical rechargeable power pack which is charged by said energy converter, said power pack storing the electrical energy and dispersing the electrical energy as required.
10. [Previously Presented] A member as claimed in Claim 1 wherein said member comprises a chair having rolling casters for generating said electrical energy.
11. [Previously Presented] A member as claimed in Claim 1 wherein said member comprises a chair and said chair has a back and seat and a moveable hinge between said back and seat for generating said electrical energy.
12. [Previously Presented] A member as claimed in Claim 1 further having electrically operated body repositioning means powered by said energy converter, or rechargeable power pack.
13. [Previously Presented] A member as claimed in Claim 12 wherein said member comprises a chair and said body repositioning means comprises a lumbar adjustment member, and said chair further includes an electrically generated timer which provides timed interval repositioning of said lumbar adjustment members.
14. [Cancelled]
15. [Cancelled]
16. [Currently Amended] A chair having electrical power requirements, and a generator carried by said chair for converting energy to which the chair is exposed to electrical energy for powering said electrical power requirements, whereby said generator converts motion of said chair to said electrical energy for meeting said electrical power requirements, and wherein said

chair includes moveable casters and said generator is disposed in said casters for converting motion of said casters to said electrical energy.

17. [Cancelled]

18. [Cancelled]

19. [Currently Amended] A chair having electrical power requirements, and a generator carried by said chair for converting energy to which the chair is exposed to electrical energy for powering said electrical power requirements. ~~A chair as claimed in Claim 16~~ further including a rechargeable battery carried by said chair, wherein said generator recharges said battery, said battery powering said electrical power requirements of said chair.

20. [Currently Amended] A chair having an electronic display ~~electrical power requirements~~ for displaying information comprising:

- (a) a rechargeable battery carried by said chair for powering said electronic display ~~electrical power generator~~;
- (b) solar power means carried by said chair for:
 - (i) providing power to said electronic display ~~electrical power requirements~~ to display said information; and
 - (ii) recharging said rechargeable battery;
- (c) chair movement generator means for:
 - (i) providing power to said electronic display ~~electrical power requirements~~ to display said information; and
 - (ii) recharging said rechargeable battery;

wherein said rechargeable battery ~~[[means]]~~ provides power to said electronic display for displaying said information.

21. [New] A chair comprising:

- (a) an information output device which outputs information from said chair; and
- (b) rolling casters for generating said electrical energy for powering said information output device.

22. [New] A chair comprising:

- (a) an information output device which outputs information from said chair;

- (b) an energy converter; and
- (c) a moveable hinge linked to said energy converter for generating electrical energy in response to movement;

wherein said energy converter converts energy for powering said information output device.

23. [New] A chair as claimed in Claim 22 wherein said chair has a back and a seat and said moveable hinge is located between said back and said seat for generating said electrical energy.

24. [New] A chair as claimed in Claim 22 wherein said chair is connected to a pedestal chair base and said moveable hinge is located between said chair and said pedestal chair base for generating said electrical energy.

25. [New] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including information circuitry which outputs information about said member and an energy converter disposed on said member for converting energy to which the member is exposed to electrical energy for powering said information circuitry.
